

A Donor Approach to supporting CAADP Compacts

Terri Sarch
Agriculture and Food Security Adviser, DFID Africa Regional Dept; and
CAADP DP Task team member

September 7th 2009

Outline

- What is the 'Donor Approach'?
- Why is it important?
- What difference will it make?
- An outline of the approach
- What do you think?

What is the Donor Approach?

- A series of joint steps that we're asking donors to commit to
- Proposed by CAADP DP task team based on CAADP process
- The aim is to bring donors together to support CAADP compacts
- It's an action plan but it's not a blueprint
- Essentially, a statement of good practice
- Based on agreed principles

Why is it important?

- Increasing agricultural productivity and fighting hunger
- Financial commitments since 2008 food price crisis
- Need to coordinate new investment
- Need to prioritise country-led planning
- Not new - but more urgent

What difference will it make?

- CAADP aims to increase investment and productivity to halve hunger
- E.g. Rwanda
- Strengthen planning and prioritisation
- Donors need to improve response since Rwanda
- Move beyond declarations of principle to action

Overview of the Donor Approach

- Promote the country-led agricultural planning processes
- Work in partnership with CAADP
- Build capacity of key stakeholders
- Align with the strategy and processes generated by CAADP
- Co-finance investment programmes
- Jointly monitor and review progress
- Actions at country level
- Actions at international level

Actions proposed at country level

Four stage process, adapted to each country's situation:

- 1. Engagement and partnership development
- 2. Evidence-based planning
- 3. Building alliances for investment
- 4. Programme implementation, M&E and peer review

Actions at International Level

- Support and encouragement
- Capacity building for ADWGs
- Lobbying – profile and policy coherence
- Finance for the process
- Regional compacts
- Mutual accountability

What do you think?

- Points of clarification
- Then group discussions...
- Review key issues emerging
