

# Burkina Faso

## Recent Progress of Platform Activities

In March the Platform held a video conference between the Burkinabe and Cambodian development partners to facilitate the exchange of lessons learned and to identify further collaborative activities between the Platform and the BF development partners in Burkina Faso. The BF development partners active in the agricultural sector recently took part in a Joint Donors' Competence Development Network (Train4Dev) training on SWApS in agriculture.

At the same time, the development partners have developed a comprehensive road map for the preparation process towards a planned agricultural SWAp.

## Selected Documents on Harmonisation & Alignment in the Rural Sector of Burkina Faso

GDPRD Working Paper: Assessment Study on Harmonisation & Alignment in Rural Development in four pilot countries | 2005

Our members selected the countries of Nicaragua, Burkina Faso, Tanzania and Cambodia to assess current achievements, opportunities and constraints to H&A in rural development, and to identify possible approaches and actions for us to increase overall aid effectiveness in the rural sector in these countries as well as on a global scale. The studies are working papers for us and do not pretend to reflect the opinions of all stakeholders involved in rural development in the respective countries.

GDPRD Working Paper: Assessment Study on Harmonisation and Alignment in Rural Development – The Case of Burkina Faso

This paper is an extract of a mission report in French. The original report describes the course and the results of the mission, including documentation of the feedback presented on 18 February 2005 to several members of the Technical and Financial Partners. Here we translate essential information about the institutional context for alignment, the donor diversity, their efforts to harmonise, the success and some obstacles. Finally we concentrate on the themes and challenges of harmonisation and alignment hoping to enrich the international discussion and the H&A-efforts in Burkina Faso.

Selected Documents on Harmonisation & Alignment in Burkina Faso in general

Burkina Faso fact-sheet on country-level harmonisation

The Country Implementation Tracking Tool (CITT) is an up-dated catalog of detailed information on country-level harmonisation initiatives and activities. For Burkina Faso a brief overview of donor coordination and harmonisation activities is followed by details on government-donor activities around agreed focus areas/components of the country harmonisation programme.
