

**ANNUAL  
GENERAL ASSEMBLY  
#AGA2018**

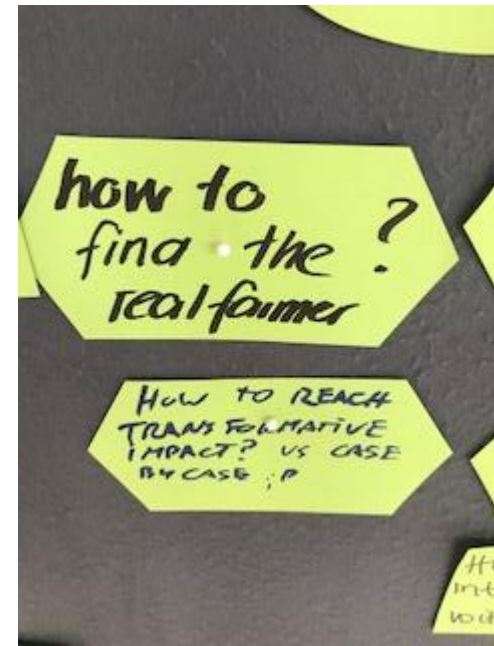

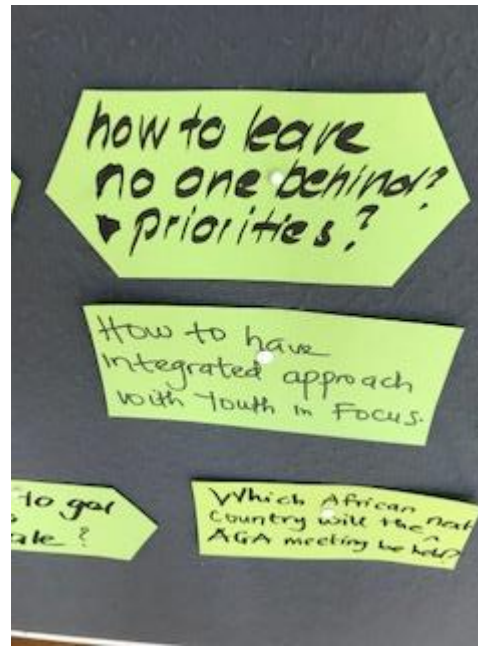

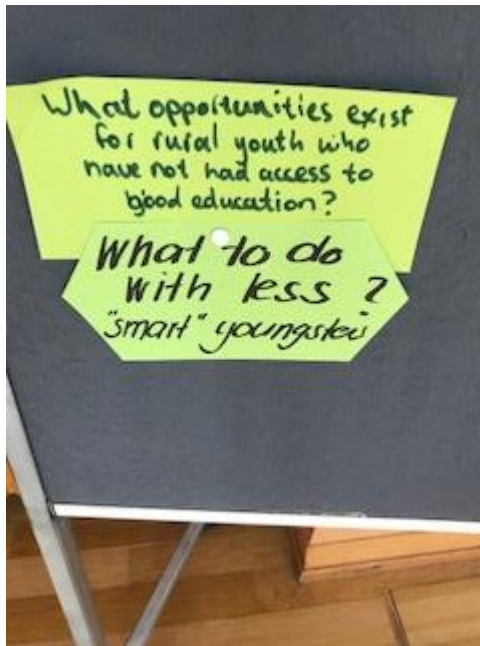

# **HARVESTING THE COLLECTIVE WISDOM**

**Moderation: NANCY WHITE**

**MAHEDER ADIMASSU**, Maheder food processing PLC, General Manger

**HERNÁN MANSON**, ITC, Head of Inclusive Agribusiness and Trade

## What Resonates?

Inclusiveness requires a strong integrated – system approach that is bottom up and generates the demand to be included and for the support services  
Different approaches are not either or they go together: we need to create impact

# WOW WOW MOMENT

Youth should be engaged as more than just "Beneficiaries"!!!

to bring decisions to Youth on the ground!  
get Youth involved in decision making!

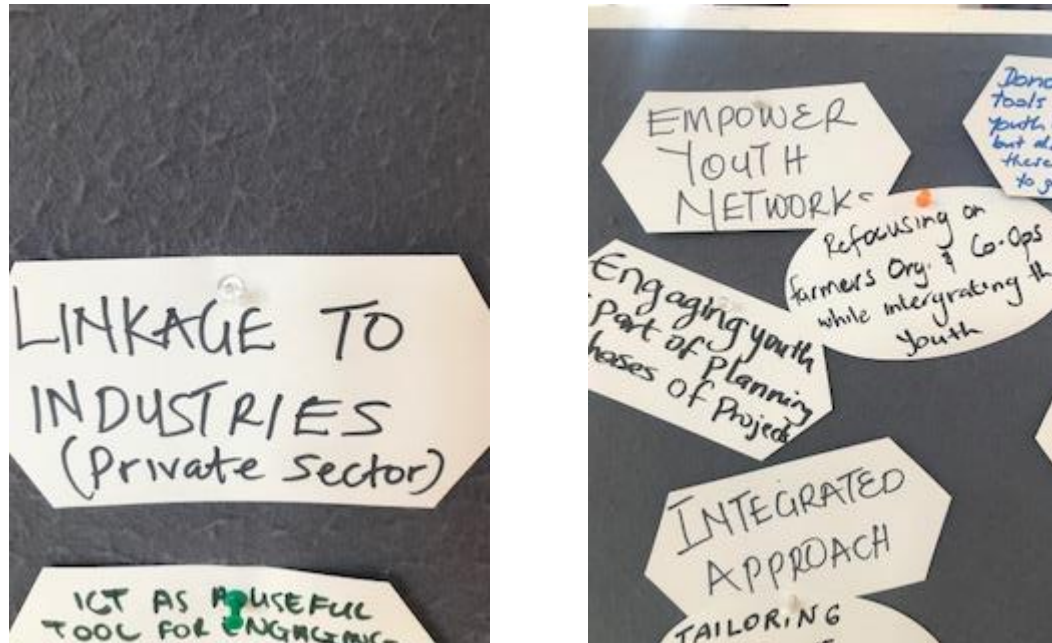

What is the role of the national government in supporting youth in agriculture for creating enabling environment?

How to overcome differences in objectives (Jobs, rural dev security, migration, etc) when moving from talk to action?..

Reinforce national systems and institutions to facilitate participatory approaches and embed youth agenda as policy of state – not just government policy (PAKISAMA example) resilience and trajectories!

## What Resonates? And what is a challenge?

**Government, Farmers, business SMEs; Donors and IOs / CSO cannot solve it alone!!  
Partnerships are key  
And also with larger private sector...**

## What Action in future? Not just jobs but quality of livelihoods...

Also Focus on the **bottom of the pyramid** and empower business development, Farmer and sector Organizations + **Youth capabilities to learn and adapt**
