

What is the International Trade Centre?

ITC is the joint agency of the World Trade Organisation (WTO) and the United Nations.

ITC's mission is to foster inclusive and sustainable growth and development through trade and international business development.

ITC's goals:

- Strengthen the integration of the business sector of developing countries and the economies in transition into the economy
- Improve the performance of trade and investment support institutions for the benefit of SMEs
- Improve the international competitiveness of SMEs

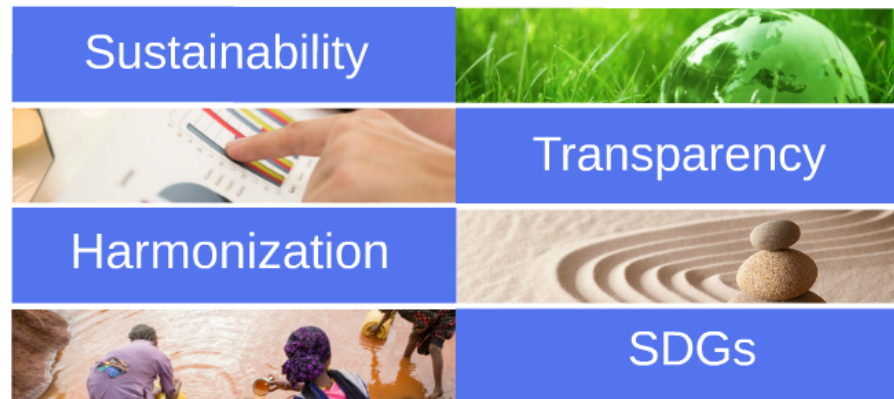

Trade for Sustainable Development Programme

The challenge

- Meeting *mandatory* market access requirements no longer sufficient
- Voluntary sustainability standards (VSS) needed to access Global Value Chains
- Confusion among Small Medium size Enterprises, Trade and Investment Support Institutions and governments around the proliferating VSS
- Lack of credible, reliable & neutral resources/tools to deal with the complexity of VSS

Our response / T4SD Principles

- T4SD Principles - over 70 signatories

Official Mission Statement

Our mission is to connect disadvantaged producers and consumers, promote fairer trading conditions and empower producers to combat poverty, strengthen their position and take more control over their lives. Our vision and mission will be reflected in the values by which we work as an organization so that we ourselves set an example for the changes we seek in others. Therefore we will work collaboratively and seek to empower those who wish to be partners in our mission. Trust is a crucial factor in our work and we will be mindful of our responsibilities to those who place their trust in us. Embracing transparency and stakeholder participation is an important way that we will be accountable for our work.

Year of Establishment 1993

Fairtrade International (FLO) Bonner Talweg 177 53129 Bonn

Website

<http://www.fairtrade.net>

Key Features

- Fairtrade provides producers with access to a fast growing market segment that is highly recognized by consumers in the global North. - Fairtrade standards are designed to tackle poverty and empower producers in the poorest countries in the world. The standards apply to both producers and traders. - The Fairtrade standards are developed through a collaborative and voluntary process by members, farmers, industry, scientists and advisors from the private and public sector. The main components of fair and sustainable trading relations in the Fairtrade Textile standard - Criteria for all stages of production for the entire supply chain: all supply chain actors including brands need to establish fair, reliable and predictable contract arrangements to facilitate long term investments in the improvement of workers' conditions. Once their entire supply chain has been certified, products may carry the Fairtrade Textile Production Mark (PDF). Product packaging will also indicate the brand's progress towards achieving living wages in the product supply chain. - It is applicable in only countries where Freedom of Association is possible as determined by the geographic scope policy. Excluded countries are listed in the policy. - The standard is open to other sustainable fibres, in addition to Fairtrade cotton, in order to leverage supply chains and reach a broader range of factories and workers as determined by the Fairtrade sustainable Fibre Criteria. - All subcontractors must be registered and agree to audits. The subcontractors comply with labour conditions and the grievance procedures. There must be a management system in place to monitor and support subcontractor compliance. The Standard includes: - Core requirements, which must be met by producer organizations before initial certification; and - Development requirements, against which compliance must be demonstrated over time and by means of continuous improvement. source: [//www.fairtrade.net/standards/our-standards/textile-standard.html](http://www.fairtrade.net/standards/our-standards/textile-standard.html)

Facts and Figures

- 19 national Fairtrade organizations operating in 24 countries (as of 2014) to improve market access for Small Producers and working conditions for Plantation Workers. - 1210 producer organizations, representing over 1.4 million farmers (80%) and workers (20%) in 74 countries (as of 2013) - €86 million premium paid (as of 2013) - €5.5 billion Fairtrade sales in over 125 countries (as of 2013)

Company Production

Provide information about the products produced or processed by your company, or the services provided. You can provide information and pictures for more than one product. This will make your company profile much more attractive to potential business partners. Business partners will be able to review this information as part of the Sustainability Network if you make your profile PUBLIC. This will increase your chances of business partners reaching out to you.

Special Projects

Sustainable Agriculture Initiative

Training programme: Capacity Building on the ground and beyond

From 2009 to 2017 the T4SD team has

completed **95+**
training events

and **60+**
webinars

trained **3,000+**
private sector

and **650+**
public sector participants
in more than
50 countries

Experience from ITC-Swisscontact project:

Basic Guidelines for Sustainable Cocoa/ Lineamientos Básicos para un Cacao Sostenible (LBCS)

The LBCS project:

- ITC and Swisscontact initiated a programme to incorporate LBCS into the Standards Map online tool to [empower cocoa producers in Colombia](#) and [raise awareness around sustainability issues](#) required by certifications such as Fairtrade, UTZ and Rainforest Alliance
- ITC has developed an [off-line version of the LBCS tool](#), to enable farmers to [perform self-assessments](#) that allow them to get a first diagnostic report of areas which they need to improve before starting an official certification process

Launched: September 2015

Geographical scope: Colombia

Project results:

- By using the offline version of the LBCS tool, [26 farmer organizations](#) were trained and [500 cocoa farmers assessed](#) against the basic criteria for sustainable cocoa, with the goal to reach [1,000 farmers in 2016](#)
- The tool [creates greater awareness](#) of the LBCS and its benefits to cocoa farmers, increasing their access and competitiveness in international markets
