

How will climate change and green transitions affect jobs and people?

Southeast Asia has achieved remarkable economic growth over the past few decades, but it has relied heavily on natural resources.

As a result, climate-related risks are threatening over 100 million jobs, mostly informal, in environment-related sectors such as energy or agriculture. Protecting the livelihoods of these vulnerable populations calls for urgent environmental adaptation and mitigation measures, but also for bold social policies.

This new OECD report provides policy makers of the region with fresh evidence on the potential effects of climate change and the green transition on jobs and people.

Join policy makers and experts in this hybrid event to discover the report's key findings, and discuss social policy priorities for Southeast Asia.

The OECD Development Centre presents:

“Towards greener and more inclusive societies in Southeast Asia”

11 March 2024

OECD, Chateau Room D (hybrid)

With simultaneous interpretation in English/French

Southeast Asia has achieved remarkable economic growth over the past few decades, but it has relied heavily on natural resources. As a result, climate-related risks are threatening over 100 million jobs, mostly informal, in environment-related sectors such as energy or agriculture. Protecting the livelihoods of these vulnerable populations calls for urgent environmental adaptation and mitigation measures, but also for bold social policies. The event will present the key findings from OECD’s new report: *Towards greener and more inclusive societies in Southeast Asia* and discuss policy priorities for countries in the region undertaking green transitions.

What social protection schemes are needed to protect workers likely affected by climate change or green transition? How can skill strategies support the reskilling and/or reallocation of workers in losing sectors and prepare labour entrants for new jobs? How can affected regions be prepared for an inclusive green transition?

DRAFT AGENDA 19.02.2024

9:30 – 10:00	<i>Welcome coffee</i>
10:00 – 10:20	Opening remarks Mathias Cormann , Secretary-General, Organisation for Economic Co-operation and Development Sangdae Choi , Ambassador, Permanent Representative of Korea to the OECD
